Excellent for commercial applications

Controls

°Stelpro covers all aspects of your comfort, offering a total solution.

To control room temperature and manage your comfort, several choices are available:

Built-in electronic thermostat:
Optional for 120 and 240 V models, the built-in thermostat allows you to control the temperature directly from your convector.

Electronic wall thermostat:
Your convector can be controlled by an electronic wall thermostat, programmable or not. (optional)

Triac relay:
To control your unit with an energy management system, the triac relay is the ideal solution. Can be either built-in or remotely installed.
(optional)
